### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 6739971. Although the conflicting claims are not identical, they are not patentably distinct from each other because a game play engine is a processor and applicant claimed steps/features that unnecessarily limited the invention where patentability did not lie within those steps/features. For instance, randomly selecting an outcome unnecessarily limited Devaull ‘971 to a form of game with a random outcome but patentability did not lie within randomly selecting an outcome, thus it would have been obvious to an artisan to omit to randomly select an outcome and randomly selecting an outcome as claimed by Devaull ‘971 so as not be limited by form of game including random outcome in order to claim a broader form of invention for improved patent protection. Devaull ‘971 also claims steps/features of ‘699 including redeeming for money (clm 2-3,5-8, 16-17, 19-

22) or a game feature (clm 4-9, 18-23) and includes different numbers of bonus points (clm 8, 10-13, 22, 24-27) and interactive (clm 9, 23). Free play may be interpreted as either an alternative cash payout or as a bonus game feature.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Berman permits player to trade game credits for bonus feature. Englman accumulates bonus points for redemption for a bonus value based on game state or position/location in a ladder/trail game or on meter.
